

## Cloud PBX

# Looking for simple, flexible, easy to scale, and cheaper options, with good quality service?

One-on-one interactions always win over email.

This is why the telephone is still relevant in this highly connected world.

Many of you are already considering hosted or Cloud PBX/VoIP. It is definitely the right time to start looking at this option. But to fully take advantage of Cloud PBX/VoIP, you need to get your services from a trusted cloud provider.

You can work with a VoIP provider from anywhere in the world, but will their services be available during your business hours, or even 24/7? Focus on certified and renowned Cloud PBX providers to get the best telephone system.

Only a redundant and stable platform will give you the highest level of service.

# IP Phones

With Cloud PBX, you get HD Voice IP Phones from certified brands.

We pre-configure all phones prior to shipping, so all you need to do is plug and play.

You can take advantage of the SherWeb Care Protection Plan to purchase your IP phone over 24 months. It offers a full end-to-end protection that includes the replacement of an accidentally damaged device that is no longer covered by the warranty.
